## Natural & Relaxed Wedding Photography

This leaflet has the options for me photographing your wedding day. I hope it helps you and when you want further information I will be delighted to assist you.

Wedding photography that is more than an arrangement of people in a pose. It should capture the spirit of your day and they are your memory of it. I do not attend a wedding intending to create an exact number of pictures.

I only photograph one wedding a day and I am at your disposal through the best part of the day.

I find that people like how natural my photographs are, and how much they reflect the joy of the day. As well as capturing the day as it happens, I expect friends and family to want relaxed groups. For me, the trick is - making sure everyone is enjoying themselves!

From a typical wedding there are at about 150 pictures produced. This is decided by the length of time you wish me to be present. Your photographs are produced as proofs to browse at home. Friends & relations can order pictures at sensible prices on the forms provided. Your pictures can also be available to view on the internet and the link can be emailed to your friends.

You can see my photographs displayed in Grovers, which is open seven days a week. Your prints, posters and books are produced by myself at Grovers. I have the unlimited resources to make the very best of your pictures.
